The tailor-made packaging houses several compartments
in which all the elements are packed with care

MOVEMENT

CH 3.72 movement
3 tunes of 36 seconds each
72-note comb
More than 1'200 pins per cylinder

CONCEPT

Slightly Windy is a musical **piece of art** born from the collaboration between:

✓REUGE

✓and **ECAL** (University of Art & Design Lausanne) and the Campana Brothers

Designer : José Ferrufino

While visiting the REUGE Manufacture, Mr Ferrufino was struck by the beauty of the musical movement and the feeling of well-being induced by listening to the melodies. It felt like witnessing a moment of grace. The visit was a great source of inspiration when he designed the piece.

Slightly Windy transcribes the beauty of nature lulled by the wind and music.

Mechanism

Triggering the musical movement causes the motion of the cam module and the swaying movement of the ears of wheat, like the rhythm of the wind.
